## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102/103***

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-2, 4, 7-8, 12-13, 22, 24-25, 31-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Chiang et al (US5590658), see Fig. 12 and col. 15 line 66 – col. 16 line 37.

Claims 3, 5-6, 9, 20-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chiang et al in view of Jeong (US6658141). The former is applied as above. It would have been obvious in view of the latter elements 40, 50, 60 to provide filtering after summing and as a ratio related to sidelobe levels which in turn are a form of differencing since this was known to improve image resolution.

Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Chiang et al as applied to claim 2 above, and further in view of Ossmann et al since col. 2 line 10 therein teaches that apodization to minimize sidelobes was well-known to be effectable via receive gain controls..

***Allowable Subject Matter***

Claims 11, 27 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

This action is not made final however the case should be prepared for final action.
